

# CropSense AI: Empowering Aggregators & Off-takers

*Partner with CropSense AI to unlock data-driven visibility across agricultural supply chains.*

 **091-6000-8264**

## The Challenge

Aggregators and off-takers often face these critical questions in agro-export:

- ✓ How do I ensure full traceability from farm to export?
- ✓ Can I forecast harvests and match supply to demand?
- ✓ What risks could affect crop quality or export compliance?

**The truth:** traditional supply chain management is manual, fragmented, and often based on incomplete data. This creates inefficiencies, quality issues, and limits export opportunities.

## Our Solution

CropSense AI is an agri-intelligence platform that brings traceability, predictive analytics, and compliance to agro-export operations. We help aggregators and off-takers:

### Boost Sourcing Confidence

Farm harvest forecasting with verified yield tracking and demand-supply matching.

### Optimize Supply Chain Visibility

Geo-tagged crop profiles, AI-powered alerts for quality risks like pests or climate events.

### Deliver Export-Ready Solutions

Export readiness insights, digital farmer registry for compliance and scalable sourcing.

### Strengthen Competitive Advantage

Stand out by offering “sourcing + traceability,” attracting premium buyers and partners who demand quality and compliance.

## From Farm to Export Confidence

A step-by-step process that transforms raw farm data into clear insights aggregators and off-takers can trust.

Field Data  
Integration

Forecasts, Traceability  
& Compliance

Demand Supply  
Matching

## Value for Aggregators & Off-takers

- ✓ Increase supply chain efficiency & quality assurance
- ✓ Attract premium export markets (local & global buyers)
- ✓ Reduce compliance risks & uncertainty
- ✓ Position as a data-driven, sustainable leader
